

## How to activate SMS on your Vitelity DIDs (a quick-start guide).

1. Login to the Vitelity user portal and go to the DIDs > SMS page:

2. Select the already provisioned DID that you want to activate SMS on from the drop-down menu:

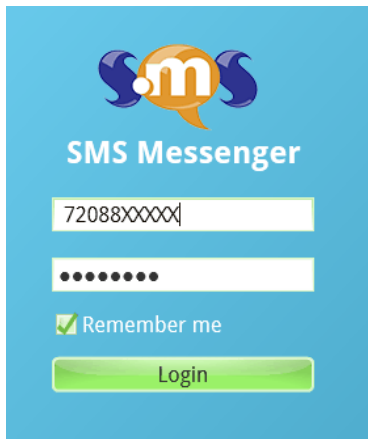

3. Create a password for the new SMS account (the telephone number is the username) and select the payment plan and click go.

4. Go to [www.s.ms](http://www.s.ms). and download the S.MS Messenger Client:

5. Launch the S.MS client from your desktop using the DID as the username and the password you created from step 3.

6. Once you are in the SMS Messenger client, click the SMS Help box on the right and follow the instructions to activate the account.

7. Now you can go back to the SMS Messenger main screen and add a new contact to begin using the SMS service. If you receive a message to your number SMS will automatically create a contact for that person and add it to your contacts list.
8. If you need to manage or change your SMS accounts you can do so by going back to the Vitelity user portal to the SMS page as noted in step 1.
